1972

VOLUME 12, 1972

PERGAMON PRESS
OXFORD : NEW YORK : BRAUNSCHWEIG

U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry and D. E. Brown

Publishing, Subscription and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW

Annual subscription rate £66 ($165)
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.
Orders should be sent to the distributors at either of the following addresses:
Headington Hill Hall, Oxford OX3 0BW
Maxwell House, Fairview Park, Elmsford, N.Y. 10523

Microform Subscriptions & Back Issues
Current subscriptions on microfiche and microfilm, and back files on microfilm as well as back issues in the regular editions of all previously published volumes are available from our sole distributor, Microforms International Marketing Corporation Inc. (MicroMark) at the most convenient address:
Cowper House, Olney, Bucks., England
Fairview Park, Elmsford, New York 10523, U.S.A.

LIST OF CONTENTS

Number 1

PAGE

R. G. STRONGIN: A stochastic approach to finding the zero of a function 1

I. A. KRYLOV and F. L. CHERNOUS'KO: An algorithm for the method of successive approximations in optimal control problems 15

A. G. SUKHAREV: Best sequential search strategies for finding an extremum 39

V. F. DEM'YANOV: Acceleration of convergence when solving minimax problems 60

V. I. PLOTNIKOV and V. I. SUMIN: The optimization of objects with distributed parameters, described by Goursat–Darboux systems 73

V. M. GORLOV: On the existence of a value in games involving pursuit 93

YU. G. EVTUSHENKO: A numerical method for finding best guaranteed estimates 109

I. R. SAARNIIT: Construction and convergence of an h^2-scheme for a linear boundary value problem for a second-order differential equation with deviating argument 129

A. A. ARSEN'EV: On features of the analytic continuation and resonance properties of the solution of the scattering problem for Helmholtz's equation 139

V. B. GLASKO, N. I. KULIK and A. N. TIKHONOV: Determination of the geoelectric cross-section by the regularization method 174

B. A. KARGIN and G. A. MIKHAILOV: The efficiency of the use of asymptotic solutions in calculations by the Monte Carlo method 187

L. A. SKAL'KO and V. M. SKURLOV: Electromagnetic field of a linear radiator situated within a parabolic cylinder with slits 198

YU. I. ZHURAVLEV and SH. E. TULYAGANOV: Measures of the importance of objects in complex systems 211

Short Communications

E. L. ZHUKOVSKII: Statistical regularization of systems of algebraic equations 230

O. A. TIMAN: Brauer's limits for the characteristic roots of irreducible stochastic matrices 240

A. V. BARANOV: A method of calculating the complex roots of a system of non-linear equations 251

A. A. ABRAMOV and A. N. GAIPOVA: The solution of some equations containing discontinuous monotonic operators 259

PAGE

V. A. VINOKUROV: An approximate discrepancy method in non-reflexive spaces 265
T. I. SAVELOVA: Solution by the regularization method of a convolution type equation with an inaccurately defined kernel 274
A. A. FOKANOVA: Generalization of a method of solving non-linear equations 281
V. M. VERZHBITSKII and Z. V. TSALYUK: A strengthened Newton–Kantorovich method with approximation of the inverse operator 287
A. V. PEVNYI: Minimization of maximin functions 295
V. ALIEV: Two approaches to the difference method of solving Neumann's problem in a rectangular region 301
A. I. IVANOV: Convergence of the collocation method for quasilinear second-order equations of parabolic type 310
E. A. POLYANSKII: The connection between the solutions of the Helmholtz equation and those of Schrödinger type equations 318
B. M. GOLYBITSKII and M. V. TANTASHEV: Limitation of the variance of "local" estimates in the solution of radiative transfer problems by the Monte Carlo method 330
I. F. PODLIVAEV and YU. I. RUZU: Calculation of the total flux at a point 336
A. I. KHISAMUTDINOV: Behaviour of the variance in the measurement of the distribution of the mean free path 343
YU. B. BREBENSHCHIKOV and A. V. SHIPILIN: Maximum propulsion nozzles with a given side surface area 351
V. I. ROZENBERG: Diffraction of waves by an arbitrary set of non-concentrically stratified spheres 357
M. K. KERIMOV: Some new mathematical books 359

Number 2

PAGE

A. V. GONCHARSKII, L. G. GUSHCHINA, A. S. LEONOV and A. G. YAGOLA: Some algorithms for finding the approximate solution of incorrect problems in a set of monotonic functions • 1
R. P. FEDORENKO: The iterative solution of linear programming problems 19
D. A. MOLODTSOV: The non-antagonistic Gross's model 33
V. V. FEDOROV: The penalty function method in the maximin determination problem 47
N. N. KUZNETSOV: Asymptotic behaviour of the solutions of the finite-difference Cauchy problem 65

Vol.
12
1972

PAGE

I. V. FRYAZINOV and M. I. BAKIROVA: Economical difference schemes for solving the heat conduction equation in polar, cylindrical and spherical coordinates 87

V. B. ANDREEV and S. A. KRYAKVINA: The source function of the difference Laplace operator 101

M. V. FEDORYUK: Helmholtz's equation in a waveguide (elimination of the boundary condition at infinity) 115

V. G. SOLOGUB: Short-wave asymptotic behaviour of the solution of the problem of diffraction by a circular disk 135

A. A. KIRILENKO, S. A. MASALOV and V. P. SHESTOPALOV: Wave diffraction at a "venetian blind" tape grating 165

S. K. GODUNOV and G. P. PROKOPOV: The use of moving meshes in gas-dynamical computations 182

M. YA. IVANOV, A. I. KRAIKO and N. V. MIKHAILOV: A method of through computation for two- and three-dimensional supersonic flows. I 196

E. L. ZHUKOVSKII and V. A. MOROZOV: On successive Bayes regularization of systems of algebraic equations 222

D. G. PERADZE: Comparison of stochastic and stationary estimates for the final error of an iterative process 224

I. P. MYSOVSKIKH: The application of orthogonal polynomials to cubature formulae 228

M. I. GIL': On an approximate method of Laplace inversion 240

V. A. VINOKUROV: Two notes on the choice of regularization parameter 249

M. DRYYA: Splitting operator difference schemes for a general system of second-order hyperbolic equations 254

TKHAI KUANG: On a general method for integrating Schrödinger's equation with singular right-hand side in a constant homogeneous electromagnetic field 262

V. V. VASIN: On the β-convergence of the projection method for non-linear operator equations 266

YU. I. KHUDAK: On the convergence of a family of regularizing algorithms 275

A. D. GORBUNOV: On Adams' methods of maximal accuracy 284

V. A. GORELIK: Approximate search for a maximum under constraints connecting the variables 294

E. M. SHEVCHENKO: The principle of best guaranteed result in control problems involving several functionals 306

D. K. FADDEEV: On norms in spaces of multilinear forms 313

A. A. ABRAMOV and A. N. GAIPOVA: On the solvability of certain equations containing monotonic discontinuous transformations 320

V. I. UL'YANOVA: On the displacement of boundary conditions through singular points 325

V. V. DYAKIN and V. P. SHIROKOVSKII: Estimation of the convergence rate of the Green's function method in electron spectrum computations 332

PAGE

V. I. IVANOV: Calculation of corrections to geometrical optics—III. The dynamic problem of the theory of elasticity 339
B. V. ALEKSEEV and V. R. YANOVSKII: Relaxation of a reacting gas described by the Boltzmann kinetic equation 349
V. V. TUMASONIS: Extension of the system of equivalent transformations of expressions 360
Scientific Information 367
Book Reviews 369

Number 3

YU. P. IVANILOV and A. I. PROPOI: Problems of dynamic convex programming 1
V. F. BUTUZOV: Asymptotic properties of the solution of a finite-difference equation with small steps in a rectangular region 14
V. B. ANDREEV: Stability of finite-difference schemes for elliptic equations with respect to Dirichlet boundary conditions 35
I. V. FRYAZINOV: Economic schemes for the equation of heat conduction with a boundary condition of the third kind 53
YU. I. MALOV, L. K. MARTINSON and K. B. PAVLOV: Solution by separation of the variables of some mixed boundary value problems in the hydrodynamics of conducting media 71
YU. I. ERSHOV and S. B. SHIKHOV: Integral transforms as a means of solving boundary value problems in neutron transport theory 87
V. I. MYSHENKOV: Numerical study of viscous gas flow in the wake of a plane body 108
F. H. HARLOW and C. W. HIRT: Recent extensions to Eulerian methods for numerical fluid dynamics 123
I. L. BARSKII: Asymptotic estimates for flows with free boundaries 142
V. V. ALEKSANDROV and V. N. KOTEROV: Classification of shock waves in a radiating gas 160
B. V. ALEKSEEV: A perturbation method for the theory of transport processes in reacting gases 176
V. A. CHEBAKOV: Plane packings of a tree 194
P. N. KUZNETSOV and A. S. YUDINA: Some properties of the zeros of the cylinder functions of two real variables 208
G. N. PYKHTEEV: Coefficient evaluation and error estimation of interpolation quadrature formulas for the simplest Cauchy-type integrals and singular integrals along an open contour 219
V. A. VINOKUROV: The error of the approximate solution of linear problems 233

Vol.
12
1972

PAGE

A. V. GONCHARSKII, A. S. LEONOV and A. G. YAGOLA: Some estimates of the rate of convergence of regularized approximations for equations of the convolution type 243

V. A. TUPCHIEV: Asymptotic solution of the Cauchy problem for the equation $\epsilon^2 t u_{xx} = u_t + [\phi(u)]_x$, degenerating for $\epsilon = 0$ into the problem of an arbitrary shock disintegration for the rarefaction wave case 255

G. I. BAGMUT: Difference schemes of a high order of accuracy for an equation of the Legendre type 263

L. A. RUKHOVETS: The problem of constructing variational-difference schemes for elliptic equations 272

A. V. LOTOV: Numerical method of constructing attainability sets for a linear control system 279

M. G. DMITRIEV: The continuity of the solution of the Mayer problem for a singular perturbation 284

A. I. EGOROV: Optimality conditions in a problem of the control of a heat conduction process 289

V. F. DEM'YANOV: The minimax problem with dependent constrains 299

M. YA. IVANOV and A. N. KRAIKO: A continuous calculation technique for two-dimensional and three-dimensional supersonic flows—II 309

KH. A. RAKHMATULIN and G. D. TKACHEVA: Solution by the method of sources and sinks of the problem of the impact of elastic body against a rigid obstacle 321

N. P. BRUSENTSOV: Improved bracketless notation of formulas 330

A. G. GORELIK: An indexed three-digit calculus and its geometrical interpretation 334

R. D. BACHELIS and V. G. MELAMED: Solution by the straight-line method of a quasi-linear two-phase problem of the Stefan type with weak constraints on the input data of the problem 342

Book Reviews 344

Number 4

E. L. ZHUKOVSKII and R. SH. LIPSTER: On a recurrence method for computing normal solutions of linear algebraic equations 1

YU. I. MOKIN: Class-preserving continuation of mesh functions 19

YU. B. GERMEIER and I. A. KRYLOV: Maximin search by the method of discrepancies 36

T. M. IVANOVA: The optimal control of branching processes 49

S. A. PIYAVSKII: An algorithm for finding the absolute extremum of a function 57

V. V. FEDOROV: The problem of seeking a sequential maximin 68

A. P. CHERENKOV: The minimax problem for a class of functionals characterizing distributions of resources 82

PAGE

A. V. FEDOSEEV: Optimal control in the three-sector model of the economy of an under-developed country 101

A. I. EGOROV and R. RAFATOV: Approximate solution of an optimal control problem 123

E. S. NIKOLAEV and A. A. SAMARSKII: Selection of the iterative parameters in Richardson's method 141

V. G. SOLUGOB: Diffraction of a plane wave by an infinite strip grating in the short-wave length case 159

V. YA. GOL'DIN and B. N. CHETVERUSHKIN: Methods of solving one-dimensional problems of radiation gas dynamics 177

L. S. DASHNITS and M. S. ZUSMANOVICH: On the minimal Gershgorin domain 190

A. N. TIKHONOV, A. A. SAMARSKII and A. A. ARSEN'EV: A method for the asymptotic estimation of integrals 196

E. F. VOITON and V. I. SHUSHKOV: The search for the direction of steepest descent in some minimax problems 207

S. A. PRLOVSKII; *n*-Person games with incomplete links 219

N. S. KUKUSHKIN: The role of the mutual information of the sides in games of two players with non-antagonistic interests 231

A. V. LOTOV: A numerical method of solving the Cauchy problems for Bellman's equation in the time-optimal problem for a linear system 240

A. I. RUDENKO: The non-linear problem of the relaxation of a space charge 245

A. V. NIKOFOROVA, V. A. TARASOV and V. E. TROSHCHIEV: Solution of the kinetic equations by the divergent method of characteristics 251

L. K. MARTINSON and K. B. PAVLOV: The problem of the three-dimensional localization of thermal perturbations in the theory of non-linear heat conduction 261

B. V. ALEKSEEV and V. R. YANOVSKII: Numerical simulation of the relaxation of the beam of charged particles in a strong electric field 269

V. S. AROLOVICH and V. M. MIKHELEV: Some algorithms of the distribution of resources in the multi-programme solution of problems 280

D. KH. GULYAMOV and YU. I. ZHURAVLEV: Estimation of the quality of the experts designing the training table in the pattern recognition problem 288

V. M. GINZBURG, G. G. LEVIN and S. P. TOLPINA: Computer modelling of a holographic process 295

S. M. ERMAKOV: Note on pseudorandom sequences 307

Number 5

V. N. KUBLANOVSKAYA: Application of a normalized process to the solution of linear algebraic systems 1

Vol.
12
1972

PAGE

V. F. DEM'YANOV and A. B. PEVNYI: Numerical methods for finding saddle points 11

A. I. PROPOI: Discrete control problems with phase constraints 53

YU. N. ASTAKHOV, V. A. VENIKOV, I. G. GORDIEVSKII, D. D. KARASEV, YU. N. KISELEV, V. I. SVESHNIKOV and A. A. FEDOSEEV: Some problems of the optimization of large systems 75

M. YA. ROZINSKII: Reduction of some physical problems to finding the minimum of the maximum deviation 93

L. A. KALYAKIN: The approximate solution of incorrectly posed problems in normed spaces 104

T. S. ZVERKINA: A new class of finite–difference methods 123

E. S. NIKOLAEV and A. A. SAMARSKII: The numerical stability of two-level and three-level iterative methods 140

I. V. FRYAZINOV: The convergence of additive schemes with equations on graphs 155

M. E. DMITRENKO: A variational difference method for solving the third boundary value problem for an elliptic equation in a three-dimensional domain with a smooth boundary 170

L. A. OGANESYAN: Variational–difference methods for solving the first boundary value problem for the biharmonic equation 187

V. P. GORELOV, V. I. IL'IN and V. I. YUFEREV: Solution of some problems of neutron transport theory by the method of generalized eigen-functions 200

V. N. DIESPEROV: On Green's function of the linearized viscous transonic equation 225

M. YA. IVANOV and O. A. RYL'KO: Computation of transonic flow in a three-dimensional nozzle 242

YU. P. GOLOVACHEV and F. D. POPOV: Computation of viscous gas flow with high Reynolds number past a blunt body 256

Short Communications

V. V. GORSKII and V. N. KUZ'MIN: Accuracy estimates for derivative approximation when the domain of definition of the function is unevenly divided 269

E. YA. VORONENOK: A numerical method of Laplace inversion 275

V. A. EMELICHEV and M. M. KAVALEV: On local minima in the transport problem with Schur-concave target function 282

M. G. DMITRIEV and V. S. POLESHCHUK: On the regularization of a class of unstable extremal problems 289

E. E. TAMME: On stability of difference schemes for solving ill-posed problems by the method of quasi-reversibility 294
